Commercial grade

Proven bellows & Lever applicator is designed to withstand rugged daily use in commercial environments. Pumps up to 11 oz of coffee with single push of lever.

Lid

Disassembles by hand without any tools for easy, thorough cleaning. A clean bellows keeps your coffee pure and free from bacteria and bitter coffee build up.

Brew-Thru Stem

Allows stem to remain in airpot while brewing, preserving maximum heat retention. Stainless steel ball bearing seals outlet port when airpot is not in use.

Dual Tube Stem

Creates proper mixing of the coffee inside the airpot during the brewing process. By directing all of the coffee to the bottom of the airpot the coffee strength is consistent. The first and last cup taste the same.

Level Indicator

Patent Pending level indicator visually displays volume of coffee remaining in airpot solving the most common complaint with airpots.

NSF Commercial Quality Airpot

NSF APPROVED KK AIRPOT FEATURES:

Dual Tube stem

Interchangeable lids, center push and lever action.

Attachable decaffeinated nose cap.

Glass Vacuum liner.
